AB - RU2134669 NOVELTY - Mass is composed of, weight parts: sodium liquid glass 100, magnesium-calcium oxide-carbonate product ( $\text{MgO}/\text{CaCO}_3$  with  $\text{MgO}/\text{CaCO}_3$  ratio 0.25-5.0) 8-35, and aluminum fluoride 3-5.  
    - USE - Manufacture of building materials.  
    - ADVANTAGE - Increased water resistance with required strength of material retained. 1 tbl  
    - (Dwg.0/0)  
IW - MASS MANUFACTURE POROUS SILICATE MATERIAL MICROWAVE IRRADIATE
